NEVADA SUNRISE ANNOUNCES 2010 EXPLORATION DRILLING IS COMPLETED AT GOLDEN ARROW

November 9, 2010, Vancouver, British Columbia – Nevada Sunrise Gold Corporation (“Nevada Sunrise” or the “Company”) (TSX Venture, NEV) is pleased to announce that it has been advised by Animas Resources Ltd., which is earning an interest in the Golden Arrow and Kinsley Mountain Properties, that the 2010 exploration drilling at the Golden Arrow project has been completed. The drilling program was designed to test both for additional centers of “hot-springs style” gold mineralization similar to resources already defined on the property, as well as for “Round Mountain-style” disseminated gold mineralization near the volcanic caldera margin within poorly-welded rhyolite tuff. The drilling program included a total of 4 diamond core holes for 3,785 feet drilled by Major Drilling and 10 reverse-circulation drill holes for 10,400 feet drilled by Envirotech Drilling. Drill core has been saw-split, and all drill samples are being analyzed for gold and multi-element geochemistry by American Assay Laboratories of Sparks, Nevada.

A NI 43-101 compliant Technical Resource Estimate Report for the Golden Arrow gold project dated May 1, 2009 can be found on www.sedar.com and the Company’s website.

About Nevada Sunrise

Nevada Sunrise Gold Corp. is a gold exploration company that has a portfolio of five projects in Nevada. The Company controls about 15,200 acres (6,150 hectares). Two of the projects are in exploration earn-in joint venture agreements for up to \$12 million in work commitments. The Company applies the exploration experience and technical skills of its founders to search for and acquire new gold exploration projects that are developed internally and then offered for joint venture.
