## Nevada Sunrise Begins Drilling at Golden Arrow

**March 29, 2012**, Vancouver, British Columbia – Nevada Sunrise Gold Corporation (“Nevada Sunrise” or the “Company”) (TSX-V: NEV) is pleased to announce that drilling has begun on the Golden Arrow Property, Nye County, Nevada. The drill program consists of a minimum of 10,000 feet of reverse-circulation (RC) drilling to test targets defined by the Quantec Orion 3D survey completed in the autumn of 2011.

Bill Henderson, CEO, stated, “The Orion 3D survey has added greatly to our understanding of the Golden Arrow project. Three distinctly different target types have been identified and prioritized through the employment of this advanced technology. Our initial drill program will utilize RC drilling to focus on targets that we believe have the greatest potential to identify near-surface gold bearing mineralization at Golden Arrow.”

### FORWARD LOOKING STATEMENTS

This release contains "forward-looking statements" within the meaning of applicable Canadian securities legislation. Forward-looking statements are based on a number of material factors and assumptions, including, the result of drilling and exploration activities, that contracted parties provide goods and/or services on the agreed timeframes, that equipment necessary for exploration is available as scheduled and does not incur unforeseen break downs, that no labour shortages or delays are incurred, that plant and equipment function as specified, that no unusual geological or technical problems occur, and that laboratory and other related services are available and perform as contracted. Forward-looking statements involve known and unknown risks, future events, conditions, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, prediction, projection, forecast, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the interpretation and actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of minerals; possible variations in grade or recovery rates; failure of equipment or processes to operate as anticipated; the failure of contracted parties to perform; labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of exploration, as well as those factors disclosed in

the company's publicly filed documents. Although Nevada Sunrise has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.
