TSXV: NEV**

**NEVADA SUNRISE AND ADVANTAGE LITHIUM BEGIN REGIONAL DRILLING PROGRAM AT NEPTUNE LITHIUM PROJECT, CLAYTON VALLEY, NEVADA**

**April 6, 2017**, Vancouver, British Columbia - Nevada Sunrise Gold Corporation ("Nevada Sunrise" or the "Company") (TSXV: NEV) and its exploration partner Advantage Lithium Corp. ("Advantage Lithium") (TSXV: AAL) are pleased to announce that a regional drilling program has commenced at the Neptune Lithium Project ("Neptune") located in the southern Clayton Valley of Nevada, USA. One borehole to a depth of approximately 610 metres (2,000 feet) is planned to follow up on encouraging results from a 2016 lithium brine drilling program carried out by Nevada Sunrise. Other boreholes are planned at the Jackson Wash, Aquarius and Gemini projects in the coming months.

Neptune is the subject of an earn-in agreement between Nevada Sunrise and Advantage Lithium where Advantage Lithium can earn a 50% interest in Neptune from the Company by spending CDN\$700,000 over a three-year period (see Nevada Sunrise news release dated June 20, 2016). At present, Neptune ownership is 75% Nevada Sunrise and 25% Resolve Ventures Inc. (TSXV: RSV), subject to a 3% gross overriding royalty according to the terms of an underlying option agreement with a Nevada vendor.

Nevada Sunrise completed two exploration holes at Neptune in late March 2016. Borehole N-2016-1, drilled to 457.2 metres (1,500 feet) showed anomalous lithium in a grab sample of groundwater of 6.8 mg/l lithium at a depth of 438.9 metres (1,440 feet). A third hole is underway approximately 1.6 kilometres (1 mile) to the east of hole N-2016-1 in an area interpreted from a 2016 geophysical survey to be a potential trap where denser, lithium-bearing brines could accumulate. If results from the third Neptune borehole warrant further work, a drill pad and access road have been prepared for a fourth hole location.

**About Neptune**

Neptune consists of 316 unpatented 20-acre placer claims totaling approximately 6,320 acres (2,557 hectares) and is located in an active area of lithium exploration and mining. The Silver Peak lithium mine operation, acquired by Albemarle Corporation (NYSE: ALB) in 2015, has extracted lithium minerals from brines continuously since 1966 and is located approximately 10 miles (15 kilometres) to the north of Neptune. Nevada Sunrise has an option to earn a 100% interest in Neptune, subject to a 3.0% gross overriding royalty (see Nevada Sunrise news release dated September 21, 2015 for further details of the Neptune underlying option agreement).

**About Lithium Exploration at Neptune**

Drill targets at Neptune have been generated from the integration of the results of: (1) a detailed gravity survey by a previous operator that outlined a deep, fault-bounded sub-basin, (2) a controlled source audio magnetotellurics follow-up survey that detected conductive horizons within the sub-basin, and (3) a 2016 time-domain electromagnetic survey that provided additional detail about the conductive horizons. In each of the two holes completed in 2016, permeable sedimentary, lacustrine strata interbedded with volcanic ash and other ejecta was logged at various levels throughout the holes. This type of sedimentary strata is interpreted as a requisite host horizon for lithium-bearing brines as seen in the northern Clayton Valley.

For further information on Neptune including maps showing its location and exploration plans please visit the Nevada Sunrise website at: "Projects – Nevada Lithium":  
<http://www.nevadasunrise.ca/projects/nevadalithium/>

A National Instrument 43-101 ("NI 43-101") compliant technical report on Neptune dated February 29, 2016 can be accessed on the Nevada Sunrise website at "Investors – Downloads":  
<http://www.nevadasunrise.ca/investors/>

Initial water and sediment samples collected in 2016 were submitted to ALS Minerals in Reno, NV, and analyzed at ALS Minerals in Vancouver, BC. Water samples were analyzed by ICP-AES and ICP-OES, and composite sediment samples were analyzed by 48-element, four-acid ICP-MS. Re-analysis of groundwater was carried out by Western Environmental Testing Laboratory in Reno, Nevada, where testing included analysis for specific gravity, total hardness and alkalinity, bicarbonate, carbonate, hydroxide, TDS and electrical conductivity. Anions (chloride, sulfate) were analyzed by ion chromatography. Trace metals (lithium, magnesium, boron, calcium, potassium and sodium) were analyzed by ICP-OES. All depth measurements reported, including sample and interval widths are down-hole. As holes are oriented vertical and geologic stratigraphy is primarily horizontal to sub-horizontal, downhole measurements are assumed to be close to true thickness.

Robert M. Allender, Jr., CPG, RG, SME is the Company's designated Qualified Person for this news release within the meaning of NI 43-101 and has reviewed and approved the technical information contained herein.

### **About Nevada Sunrise**

Nevada Sunrise is a junior mineral exploration company with a strong technical team based in Vancouver, BC, Canada, that holds interests in nine mineral exploration projects in the State of Nevada, USA. Nevada Sunrise began acquisitions of Nevada lithium properties in September 2015, which include options to earn a 75% interest in the Neptune project (Resolve Ventures Inc. (TSXV: RSV) owns a 25% interest), a 100% interest in the Clayton Northeast project, and a 100% interest in the Aquarius Project, all located in the Clayton Valley area. The Company also holds options to earn 100% interests in the Jackson Wash and Atlantis projects, and has a 50% participating interest in the Gemini project, each located in playas proximal to the Clayton Valley. The Company has optioned five of the Nevada lithium projects to Advantage Lithium Corp. (TSXV: AAL), and the Atlantis project is currently under option to American Lithium Corp. (TSXV: LI). The Salt Wells Lithium project, in the Carson Basin near Reno, is currently the subject of due diligence by the Company.

The Company's three key gold assets include a 21% interest in a joint venture with Pilot Gold Inc. (TSX: PLG) at Kinsley Mountain near Wendover, a 100% interest in the Golden Arrow project near Tonopah, and an option to earn a 100% interest in the Roulette gold property in the southeastern Carlin trend near Ely, with each of the properties subject to certain production royalties.

## **FORWARD LOOKING STATEMENTS**

*All statements in this release, other than statements of historical fact, are "forward-looking information" with respect to Nevada Sunrise Gold Corporation ("Nevada Sunrise") within the meaning of applicable Canadian securities laws, including statements that address future mineral production, reserve potential, exploration drilling, the future price of lithium, potential quantity and/or grade of minerals, potential size of a mineralized zone, potential expansion of mineralization, the timing and results of future resource estimates, or other study, proposed exploration and development of our exploration properties and the estimation of mineral resources. Forward-looking information is often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "project", "predict", "potential", "targeting", "intends", "believe", "potential", and similar expressions, or describes a "goal", or variation of such words and phrases or state that certain actions, events or results "may", "should", "could", "would", "might" or "will" be taken, occur or be achieved. These statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievement of Nevada Sunrise to differ materially from those anticipated in such forward-looking information.*

*Such factors include, among others, risks related to the interpretation and actual results of historical exploration at the Neptune property, reliance on technical information provided by third parties on any of our exploration properties, including access to historical information on the Neptune property, current exploration and development activities; changes in project parameters as plans continue to be refined; current economic conditions; future prices of commodities; possible variations in grade or recovery rates; failure of equipment or processes to operate as anticipated; the failure of contracted parties to perform; labor disputes and other risks of the mining industry; delays in obtaining governmental approvals, financing or in the completion of exploration, as well as those factors discussed in the section entitled "Risk Factors" in the Company's Management Discussion and Analysis for the Three Months ended December 31, 2016, which is available under Company's SEDAR profile at [www.sedar.com](http://www.sedar.com).*

*Although Nevada Sunrise has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Nevada Sunrise disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise. Accordingly, readers should not place undue reliance on forward-looking information.*

*Forward-looking statements are made as of the date hereof and accordingly are subject to change after such date. Except as otherwise indicated by Nevada Sunrise, these statements do not reflect the potential impact of any non-recurring or other special items or of any dispositions, monetizations, mergers, acquisitions, other business combinations or other transactions that may be announced or that may occur after the date hereof. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans and allowing investors and others to get a better understanding of our operating environment. Nevada Sunrise does not undertake to update any forward-looking statements that are included in this document, except in accordance with applicable securities laws.*

**Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. The Securities of Nevada Sunrise Gold Corporation have not been registered under the United States Securities Act of 1933, as amended, and may not be offered or sold within the United States or to the account or benefit of any U.S. person.**
